TECHNICAL SKILLS & TOOL FAMILIARITY

Languages: Java, TypeScript, Python

Frameworks & Tools: Node.js, React Native, ExpressJs, WebSockets, WebRTC, WebHooks, REST APIs, AWS (Basic), CI/CD (Basics)

AI & Automation: Gemini / Mistral APIs, LangChain, Prompt Engineering, RAG Pipelines

Databases: PostgreSQL, MongoDB

CS Fundamentals: Data Structures & Algorithms, DBMS, Operating Systems, Object-Oriented Programming

EXPERIENCE

Alcovia | *SDE Intern*

alcovia.life | Jan 2026 - Jun 2026

- Designed and shipped Alcovia's product ecosystem end-to-end—3 React Native apps (Student, Advisor, Admin), 2 Next.js web apps, a WebSocket service, and a bi-directional ClickUp integration across 23 entity types and 4 workspaces—backed by a 111-model PostgreSQL schema, 40 API route modules (374 endpoints), and 49 scheduled background jobs.
- Built WHOOP OAuth 2.0 biometric sync with automatic token refresh and a dead-token circuit breaker, eliminating silent sync failures that had quietly broken 3 of 5 production integrations.
- Architected two async reliability systems: a ClickUp outbox pipeline (advisory-locked drain, dead-letter queue, 5-attempt exponential backoff, 6-hour reconciler) and Gemini AI extraction pipelines for session notes and study plans—both using async-job + polling to bypass HTTP timeouts under real user load.
- Built a 20-service operations dashboard with a prorated pace-scoring algorithm, a 4-signal composite student risk index, automated end-of-month compliance escalations to ClickUp, and NPS feedback pipelines.

PROJECTS

Virtual Office | Turborepo, React.js, TypeScript, Node.js, WebRTC, websocket, PostgreSQL

- Built **"SkyScope,"** a 2D virtual office platform using a **Node.js** & **TypeScript** monorepo to combat remote team isolation through real-time spatial interaction.
- Engineered the real-time backend using a **WebSocket (ws)** server for live presence and chat, integrating **peer-to-peer WebRTC** signaling for proximity-based video calls.
- Architected with decoupled Services: an **Express** REST API for auth/data and the WebSocket server, backed by a **PostgreSQL** database with **Prisma** ORM.

ZenFit — AI-Powered Multimodal Coach | Next.js, TypeScript, MongoDB, Gemini API

- Built a **multimodal fitness coach** generating personalized workout/diet plans, exercise + food images (Gemini), and **11Labs voice guidance**.
- Implemented secure auth and **optimized MongoDB storage** with indexed queries + smart caching for fast personalized retrieval.
- Developed a **multilingual Self-RAG chat assistant** that provides contextual fitness insights and detailed responses.

ScribeAI—AI Meeting Notes | Next.js, TypeScript, Tailwind CSS, Prisma (PostgreSQL), Socket.io

- Developed a **real-time audio transcription platform** enabling **microphone/tab audio capture** (Google Meet/Zoom), **chunked audio streaming**, and **live incremental transcription** powered by **Google Gemini**.
- Implemented **robust session state management** (recording, paused, processing, completed) using **XState** and **Prisma ORM**; engineered a **fault-tolerant streaming pipeline** supporting **1+ hour recordings** with **automatic reconnection handling**.
- Optimized latency through batching + chunked audio streaming using Gemini's long-context models.

ACHIEVEMENTS & CERTIFICATIONS

Mercuria India Hackathon 2024 – 2nd Prize among 450+ teams Nationwide

Nov 2024

Emerging Tech Hackathon 2024 – 3rd Place among 200+ professionals & students

Dec 2024

EDUCATION

Siddaganga Institute of Technology

B.E. in Computer Science and Engineering (AI/ML) | CGPA: 7.5

Tumkur, India

Expected Jun 2026
