TECHNICAL SKILLS & TOOL FAMILIARITY

Languages: Python, Java, TypeScript

AI & GenAI: LangGraph, LangChain, RAG Pipelines, ChromaDB, Cohere Rerank, Gemini API

Backend & Data: FastAPI, Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, Elasticsearch, Redis

Infrastructure & Tools: Docker, Docker Compose, GitHub Actions, CI/CD, Git

CS Fundamentals: Data Structures & Algorithms, DBMS, OS, Object-Oriented Programming, System Design

EXPERIENCE

Alcovia | *Fullstack Engineering Intern*

[alcovia.life](#) | Jan 2026 – Jun 2026

- Sole engineer who designed and shipped Alcovia’s entire product from zero: 3 React Native apps (Student, Advisor, Admin), 2 Next.js web apps, a WebSocket service, and a bi-directional ClickUp integration across 23 entity types backed by a 111-model PostgreSQL schema, 40 API route modules, 374 endpoints, and 49 scheduled background jobs.
- Architected a ClickUp outbox reliability pipeline with advisory-locked draining, dead-letter handling, 5-attempt exponential backoff, and a 6-hour reconciler to keep cross-system state consistent under API failures and retries.
- Built Gemini AI extraction pipelines for session notes and study plans using async-job + polling, moving long-running AI workflows out of HTTP request paths to eliminate user-facing timeouts under real load.
- Built WHOOOP OAuth 2.0 biometric sync with automatic token refresh and a dead-token circuit breaker, eliminating silent sync failures across 3 of 5 production health-data integrations; diagnosed and fixed an iOS-only auth refresh storm via in-memory token cache and a cron job exhausting the DB connection pool.
- Owned full redesign and rebuild of [alcovia.life](#) end to end—visual direction, design system, responsive frontend, and production launch

PROJECTS

Virtual Office | Turborepo, React.js, TypeScript, Node.js, WebRTC, websocket, PostgreSQL

- Built "**SkyScope**," a 2D virtual office platform using a **Node.js** & **TypeScript** monorepo to combat remote team isolation through real-time spatial interaction.
- Engineered the real-time backend using a **WebSocket (ws)** server for live presence and chat, integrating **peer-to-peer WebRTC** signaling for proximity-based video calls.
- Architected with decoupled Services: an **Express** REST API for auth/data and the WebSocket server, backed by a **PostgreSQL** database with **Prisma** ORM.
- Implemented a lightweight CI/CD pipeline within Render to automate builds, **Jest** unit tests, and **Prisma** database migrations on each commit.

ZenFit: AI Multimodal Coach | Next.js, TypeScript, LangGraph, MongoDB, Upstash Redis, Docker

- Engineered an **AI multimodal coach** generating custom diet/workout plans, exercise/food visuals (Nanobanana/Gemini Vision), and motivational **AI voice guidance** (Gemini 2.5 TTS/ElevenLabs).
- Architected a **LangGraph Self-RAG assistant** with **ChromaDB vector search**, **Cohere reranking**, routing, and a batched document grading node for retrieval and grounding.
- Optimized backend security and TTFB using **Edge Middleware JWT verification** (jose) to eliminate DB session lookups, backed by native MongoDB and **Upstash Redis caching**.
- Containerized application with **Docker Compose** (Next.js, ChromaDB, Nginx) and automated testing/deployment via a **GitHub Actions CI/CD pipeline** (Vitest, Playwright, Vercel).

ACHIEVEMENTS & CERTIFICATIONS

Mercuria India Hackathon 2024 – 2nd Prize among 450+ teams Nationwide

Nov 2024

Emerging Tech Hackathon 2024 – 3rd Place among 200+ professionals & students

Dec 2024

EDUCATION

Siddaganga Institute of Technology

B.E. in Computer Science and Engineering (AI/ML) | CGPA: 7.72

Tumkur, India

Jun 2026
